# CONCEPT

I.D.PLAST a company specialized in manufacturing of plastic tiles, has developed a single concept of tennis surface covering : DALL'SET®. Both for indoor or outdoor use, DALL'SET® consists of patented thermoplastic surface and game line-tiles that are clipped any together to form a tennis court of the required size.

## Teaching Process

PROCESS Teaching child tennis on an adult court inevitably leads to failure. To learn the right technics, children must practice with adequate equipment (size of the racket, height of net, size of ball) on a court adapted to their size. The use of DALL'SET® surface covering of different colours allows child to :

- \* Learn more easily and with more fun as children are very sensitive to colours.
  - \* Get a better overall view of the court.
  - \* Get a better view of the different areas.
  - \* Learn to serve diagonally.
- Available in different sizes, DALL'SET® playing surfaces provide enjoyment and comfort to tennis players and learners of all ages.

## Modular Structure

Besides its many advantages, DALL'SET® offers a wide variety of playing surfaces, from private courts to professional sports clubs. The DALL'SET® range includes several sizes ranging from the

standard 36 metres adult court to the mini tennis court for children, among different other possibilities. DALL'SET® is also available as a portable kit perfectly adapted to short term events and tournaments. The kit includes a mini tennis court surface (easy and quick assembly and dismantling), a net and two poles.

## Technical

DALL'SET® surface covering is made of modular surface and game line tiles, secured together with patented clips. The tiles are made of injection moulded thermoplastic material, they are resistant to wear, self-draining, distortion proof and recyclable.

## Economic

DALL'SET® is the real answer to any needs for resurfacing your used tennis courts. DALL'SET® can easily touch down above your existing tennis court. It is a cost saving investment.

## Technical Data

- \* Ball bounce complies with norm NF 90.104
- \* All colours UV resistant
- \* Tile size : 33 x 33 cm
- \* Tile thickness : 1.5 cm
- \* Tile weight : 400 g
- \* Material : natural polypropylene added rubber UV stability

Norme  
EU14 877  
(10-2013)

## FLOOR PLAN LAYOUT

### 12 meters Mini Tennis Court

The 12 meters court is made of **1 458 tiles** 33 x 33 cm for an overall surface of **162 square meters**, ie 18 x 9 m.

### 15 meters Mini Tennis Court

The 15 meters court is made of **1 701 tiles** 33 x 33 cm for an overall surface of **189 square meters**, ie 21 x 9 m.

Suitable for children aged 7 to 9.

### 18 meters intermediate Tennis Court

The 18 meters court is made of **2 592 tiles** 33 x 33 cm for an overall surface of **288 square meters**, ie 24 x 12 m.

Suitable for children aged 9 to 12.

POSSIBILITY TO RENT  
Mini Tennis 12 - 15 - 18 m<sup>2</sup>

## Training Center

A standard adult tennis court can be turned into four 12 meters mini tennis courts. The training center is made of 5 832 tiles 33 x 33 cm.

## Progressive Tennis Surface

It is perfectly possible to regroup on a single adult court the three different surfaces already mentioned, so that the instructor can adapt the size of the playing surface to the child's age to guaranty optimal results. The progressive tennis surface is made of 5832 tiles 33 x 33 cm for an overall surface of 648 square meters, ie 36 x 18 m.

The progressive surface includes:

- \* One 12 meters mini tennis court
- \* One 15 meters mini tennis court
- \* One intermediate tennis court
- \* One collective playing surface

## 36 meters standard adult court

The 36 metres court is made of 5 832 tiles 33 x 33 cm for an overall surface of 648 square meters, ie 36 x 18 m.

ID PLAST know how leads to meet your request and to move you all the colours you wish.

## assembly

## colours

### Mini-Tennis court

### Standards Adultes court

All DALL'SET® colours are officially recognized and approved for use on public tennis courts.

## tools

- \* 1 rubber mallet
- \* 1 cutter or hand saw
- \* 1 pair of gloves
- \* 1 assembly instruction manual provided

## basic rules

- \* Respect orientation of tiles (positioning of clip holes)
- \* Start with bottom left
  - \* Work in rows (horizontal or vertical)

## MANUFACTURING

DALL'SET® tennis courts  
are manufactured  
in our factory  
and are conformed  
to ISO 9002 rules.  
Delivery time :  
4 weeks after receipt  
of your order.

## maintenance

Maintening DALL'SET®  
playing surface  
is extremely simple.

\* Once a year :  
clean the DALL'SET® tiles  
with a high pressure cleaner.

\* Once every 3 to 5 years  
: depending on indoor or  
outdoor layout : remove the  
tiles square metre by square  
metre, clean them with a high  
pressure cleaner, remove dust  
and ball bits on hard ground  
underneath with  
an industrial vaccum-cleaner  
and reassemble. Use cleaning  
products recommended for  
the maintenance  
of plastic products only.

## packaging

DALL'SET® tiles are packa-  
ged on 110 x 110 cm palet-  
tes; shrinkwrapped,  
strapped and labelled  
to the customer's address.  
Assembly : 9 tiles per square  
meter on base.

Delivery on tailboard truck  
for easy unloading.

Each palette is made of 630  
tiles, i.e 70 square meters  
(Gross weight : 260 kg)
